

## Lab 1 Part 2

### Task Description:

As a user I want to add three persons into my Favourite list. I should be able to fill in their names and phone numbers. After clicking the 'Save My Fave Three' button I should be able to see the list of persons, which I have added. The form should be hidden after the click.

Initial page look:

## Welcome to your first Lab!

### Fave Three List

Enter the Names of Your Favourite Three & their Phone Numbers

|             |       |                      |        |                      |
|-------------|-------|----------------------|--------|----------------------|
| Favourite 1 | Name: | <input type="text"/> | Phone: | <input type="text"/> |
| Favourite 2 | Name: | <input type="text"/> | Phone: | <input type="text"/> |
| Favourite 3 | Name: | <input type="text"/> | Phone: | <input type="text"/> |

Save My Fave Three

After form submission the page should look like:

## **Welcome to your first Lab!**

**Fave Three List**

**My Fave Three**

**Name: Andrei Phone: 4443332222**

**Name: John Phone: 2224443333**

**Name: Michael Phone: 1115557777**

### Technical Details:

1. Use provided files:
  - a. fave.html
  - b. fave.css
  - c. fave.js
2. Do not change fave.html or fave.css files.
3. Any changes should be made in the fave.js file.
4. fave.js file has places to add your code.
5. Possible way to solve the task:
  - a. Create class Friend with two properties: name & phone.
  - b. Listen to the form submission event.
  - c. Grab values from the form for each person and create a Friend object based on these values.
  - d. Add these objects into an array (faveList).
  - e. Loop through the faveList array and create content for displaying on the page.
  - f. Display a list of persons on the page and hide the form.
6. Form validation is not required for this task.
